Completion of manufactured and delivery date by	4/15/2017

****Dates may change with or without notice***

Q-1. In regards to the solar panel system, what are the expectations for this as the RFB does not state what the system needs to achieve?

A-1. The purpose of the solar panels is to provide supplemental power/electricity to the components of the Mobile Energy Classroom.

Q-2. In regards to line items 14-19 are there specific make and model #s for each of these systems you can suggest?

A-2. We do not have specific make and model #'s for these line items.

Q-3. What amount of time would be required for the solar panels to provide sufficient power for the entire trailer as this info will be required to know what size battery back, inverter and # of panels needed?

A-4. The panels are meant to supply supplemental power to the trailer, not full power.

All other terms and conditions remain the same.
