COURSE SUBJECT & NUMBER: CIS 101L

COURSE NAME: *Introduction to Computer Information Science - Lab

COURSE UNITS: 0 **COURSE HOURS:** By Arrangement

COURSE REQUISITES: *(Follow format of similar courses found in the college catalog.)*

Corequisite: Current enrollment in CIS 101.

COURSE DESCRIPTION: *(Write a short paragraph providing an overview of topics covered. Be sure to identify target audience--transfer, major, GE, degree/certificate, etc. If repeatable, state the number of times at end of description.)*

Students enrolling in this course must be concurrently enrolled in CIS 101. This zero-unit course provides access to the open computer lab to help students complete course assignments and master learning objectives.

COURSE OBJECTIVES: *(Use Bloom's taxonomy to formulate concise, performance-based measurable objectives common to all students. Objectives must be closely aligned with course content, assignments, and methods of evaluation.)*

Upon completion of course, the successful student will be able to:

Successfully complete CIS 101 by:

- 1) Using college computer lab to complete CIS 101 assignments.
- 2) Working with an instructor to practice the basic features of the software being learned.
- 3) Following an instructor's directions to explore the potential power of the software being learned.
- 4) Seeking an instructor's assistance in applying the software to the individual student's own environment and needs.

Course Subject & Number: CIS 101L

Course Name: *Introduction to Computer Information Science - Lab

COURSE CONTENT: *(Enter course content in terms of specific topics or a specific body of knowledge that each instructor must cover. Put topics in outline form with major and minor headings. Title 5 requires that each instructor must cover all material listed below.)*

- I. IT Vocabulary
- II. Features of an Operating System
- III. Basic Networking Principles
- IV. HTML
- V. Searching the Internet
- VI. Connecting to the Internet
- VII. Email
- VIII. Computer Hardware
- IX. Application Software
- X. Ethics and Privacy
- XI. Basic Programming Principles

Course Subject & Number: CIS 101L

Course Name: *Introduction to Computer Information Science - Lab

TYPICAL HOMEWORK ASSIGNMENTS: READING, WRITING, COMPUTATIONAL, OTHER

This information is necessary for all credit courses. Assignments should be closely related to course objectives, content, and methods of evaluation. (See sample of a "Model Outline" in the AP&P Standards & Practices handbook.) Include a range of assignments (minimum of three) from which faculty may choose when designing their syllabus.

1. Describe nature and frequency of typical reading assignments if applicable; note if any are required:

As required by CIS 101

2. Describe nature and frequency of typical writing assignments if applicable; note if any are required:

As required by CIS 101

3. Describe nature and frequency of typical computational assignments if applicable; note if any are required:

As required by CIS 101

4. Describe other types of homework assignments that students may be asked to complete; note if any are required:

A variety of supplemental activities designed to support and complement the assignments of CIS 101.

5. Describe those critical thinking skills that are derived from assignments listed above; be sure that they reflect course objectives.

Students will work with the software to expand their knowledge and understanding of different features within the various programs being learned. Students will explore the full potential of the software and apply it to their own individual and business-related needs.

6. For categories 1-4, describe the estimated time per week it would take a student to complete homework assignments. Title 5 uses the Carnegie formula for establishing units using a 2:1 ratio as follows: 1 hr. lecture = 2 hrs. homework; 2 hrs. lecture = 4 hrs. homework; etc. For example: reading textbook—2 hours; writing reports—3 hours.

None – all work is intended to be done in the lab.

Course Subject & Number: CIS 101L

Course Name: *Introduction to Computer Information Science - Lab

METHODS OF INSTRUCTION: *(Methods must be consistent with content and appropriate to objectives; state in terms of what instructor will be doing in order to present course content to students: for example, lecture, demonstration, facilitate group work, etc. Do not list specific instructional equipment.)*

Providing supplemental activities to the class, small group, or individual as needed to complement the instructor in a student's CIS 101 class.

METHODS OF EVALUATION: *(These must be clearly related to course content, assignments, and objectives in order to comply with Title 5 requirements. Describe what instructor will be looking for when evaluating various assignments and tests in order to determine whether students have met course objectives. Grades must be based on demonstrated proficiency in subject matter and determined, where appropriate, by essays, objective and essay tests, research papers or projects, problem solving exercises, or skills' demonstrations.)*

No credit/grade – no evaluation.

Suggested Texts or other Instructional Materials *(list several when possible; include title, author, publisher, date, and latest edition.)*

Fluency with Information Technology, 2nd Edition, Lawrence Synder, Addison Wesley, 2006
