“

“I love that the professors take the time and effort to work with each student individually. My plan is to get a job with this degree, go to a four-year college, and eventually work with quantum computers. This program is a great start!”

— Shane D., AVC Student

Futures are Bright!

With demand for skilled, career-educated professionals growing faster than ever, there has never been a better time to get a future-focused degree or certificate from Antelope Valley College!

48.9%

of AVC students are the first in their family to attend college.

More Education = Lower Unemployment + Higher Wages

According to the US Department of Labor

65% of all future jobs will require more education than a high school diploma.

According to the National Skills Coalition

The US Department of Labor considers many jobs in this sector to be "Bright Outlook" occupations, meaning they are projected to grow much faster than other industry averages.

Computer experts with up-to-date skills are in demand across all industry sectors!

\$100,000+

The average salary for many top jobs in this field are well over \$100,000 a year!

The Future is Here

Computer information sciences are a part of almost everything we do in our high-tech, highly connected world. It's no surprise that CIS careers are on the rise—some jobs in California are projected to expand at rates anywhere from 10 to over 40 percent by 2026!

At AVC, the Computer Information Science (CIS) program focuses on operating and programming computers, with an emphasis on business applications. Students develop a solid foundation in major operating systems (such as Windows, Mac OS, and Linux) and get high-level computer programming training in C, C++, Python, and Java. In the Computer Software Developer program, students dig even deeper into software design theory and gain real-world experience writing, testing, and debugging software programs.

Thanks to the expanding industries in the region, successful graduates often find employment with local aerospace contractors, financial institutions, and regional hospitals. If you're looking for a career that will put you on the frontlines of the future, a CIS or Software Developer degree or certificate from AVC is a great place to start!

Degrees & Certificates

-  Associate in Science - Business Computer Information Science
-  Associate in Science - Software Developer
-  Associate in Science for Transfer - Computer Science (coming soon!)
-  Certificate - Software Developer
-  Certificate - Business Computer Information Science

Affording AVC

Paying for college can be tough. We can make it easier.
