26-27 Associate in Arts in Psychology for Transfer (PSYT)

ABOUT THIS MAJOR

Political Science is the study of the acquisition and use of public power and authority. Politics and government affect everyone's life and impinge on activities in many fields. Political science is concerned with the objectives and ends of politics and the way in which political society should be organized in order to realize those objectives and ends. Courses in political science enable students to study and understand how political and governmental institutions make and implement decisions and the effects those decisions have on individual, group, and societal behavior. For more information, visit the Social and Behavioral Sciences division.
