1	i have an apple and the software given is only for other computers. i couldnt do my hw at home	May 4, 2012 5:08 PM
2	My computer is old and cannot run newer versions of Adobe products which would be more productive. I am limping along with old software, but at some point it's going to stop working. Then I will need new hardware and software or I will not be able to do my job.	May 4, 2012 10:48 AM
3	I am coming to the end of my first semester at AVC. As I have been finding out about all the services available, I haven't found a problem with any of it yet!!	May 4, 2012 1:09 AM
4	Calls to campus to contact, or leave a voicemail message for, a person or department results in being connected to a NUMBER vs. an identified entity - unless the person/department is named in the recorded greeting. Without any confirmation that the number reached is actually the intended person/department, a caller will choose the Operator option rather than risk leaving a message at the "unnamed" extension via keypad entry. The Operators are always courteous and do an *outstanding* job. However, the wait in the queue for assistance is quite often unbelievably long due to the heavy call volume. (Access to the Campus Directory is dependent upon being online. Making business calls, whether from a location on or off campus, is not.) It seems one reasonable solution could be to have a name/identity *and* the number, included in the recorded greeting at each extension. Based on simple, step-by-step instructions, it should only take a few minutes for everyone who has an extension to record a greeting that includes their name and extension number to help ensure calls/messages are correctly routed. It would definitely make the keypad-entry option more attractive and reduce the number of calls the Operator has to manage. Thank you for asking.	May 3, 2012 10:57 PM

Let's start with email: often down, hard to attach files from off campus, once it is archived onto office harddrive no longer can access from off campus, mystery "drops" (messages that never go through), lack of access to formatting when sending an email, no easy way to check spam --- I have a gmail account, and often use that professionally, since I can't risk important messages from colleagues abroad going down the rabbit hole if the avc server is down. 41	Can never reach anyone in counseling office and never get a call back.	Apr 25, 2012 10:59 PM
42	Internet in classrooms is not readily available for students, which at other community colleges seems to be a standard, while at ours its viewed as an insult to expect wifi on campus. The student e-mail service, when it works, its awful. By not being able to port it into any other email provider such as Gmail it makes the whole system redundant and almost worthless.	Apr 25, 2012 9:37 PM
43	1) The projector on the "Smart Cart" that I use in the piano room for my Commercial Music Theory class is too old and won't focus properly. The entire cart needs to be updated and/or repaired = connections - AC plug - etc... I always use my own computer laptop for all my courses (for Powerpoint, Audio MP3's etc). The computer hookup in FA4-190 is improperly grounded. When I patch my Mac into the audio and projector systems, I get hum unless I have both the projector and the audio hooked up.	Apr 25, 2012 8:34 PM
44	No wireless to access blackboard or internet resources during lecture; computer and/or projector malfunctions require some instructors to bring in their OWN computers/equipment which is unacceptable; it would be nice to have a few dedicated computers for adjunct nursing faculty to use with internet access. 59	Office computers don't always work up to speed. Email and accessibility is not always what it should be. The computers shutting down is unacceptable. Any time one walks away and the computer goes to sleep one should not have to make sure that everything is saved. One can not always make sure as you may be only walking away for a minute that turns into longer. Files then go offline.	Apr 25, 2012 1:33 PM
60	in my class there is no internet for the computer i lecture with. The computer in my office is outdated and very slow.	Apr 25, 2012 1:22 PM
61	In class, we are sometimes not able to enter certain websites due to restrictions. I understand why this may be, but, I also think that the computers should allow teachers to have access to those certain sites only during class time, for school purposes. Also, the powerpoint projecting machine tends to not work in our class as well. I think if students had what they needed to access, it would facilitate success to an extent. But, I do like some restrictions that are already put in our computers.	Apr 25, 2012 1:22 PM
62	Classroom computers that were updated to Windows 7 lost functionality. The computers need to be replaced with computers that will provide full functionality with the new operating system.	Apr 25, 2012 12:46 PM
63	It would be nice to be able to open instructor resources such as test banks at the college. It looks like we are going to chrome for search. we should discontinue internet explorer.	Apr 25, 2012 12:37 PM

Q3. If some areas of technology don't meet your needs, please explain the deficiency.

64	Printing!!!! The current printing systems for students in the library, open computer rooms and Learning Center are ridiculous. Buying a print card for a dollar is ridiculous, because most students will probably forget it or lose it. Furthermore, the card is shaped unusually. It is too long to fit in a wallet, but shorter than other cards. If we could add funds to our IDs we would not need an additional a card. The machines only accept \$1 bills. The machines are normally broken or eats my dollar. A new system needs to be invested in.	Apr 25, 2012 12:34 PM

66	Office computer still requires administrator rights to get updates for programs such as adobe. Some webinars require administrator rights to access (I did not know this until the time of the webinar and then missed the presentation). Classrooms in APL better but still have issues with projector at times and speakers (audio) very often. There is no internet access in T503/T502 and classes are held there at times. It does not read all thumb drives and does not recognize Instructor provided wireless mouse. Software in the classroom is shakey at best to operate and access information. Office software does not allow access to some documents from the college and outside sources due to compatibility. Restrictions on the system does not allow for the necessary free updates to be added to fix the problem. 86	In my chinese class, the blackboard has several problems within the online homework assignments. It is much better than for my art history which is terrible on my blackboard problems, I am not able to access the power point texts and pictures at all on several computers and it does not work very well on my brand new nook tablet either. although the pictures come up, it isn't letting me zoom in and really observe details like it should. I attempted this on my boyfriend's samsung tablet and it will not let me access the blackboard info on that tablet very well either. On the Vista computers I attempted to access the powerpoint info , it did not allow access either to the power programs but it would allow the blackboard to open. On the chinese learning programs, back to that: I am not the only student from this class that has experienced correct and incorrect answers to go in the system correctly. Also the online homework in different lessons has just stopped and not allowed to procede with the assignment, a red line pops up. Another option to blackboard might be necessary OR at least send in some professional trouble shooters ASAP.	Apr 25, 2012 9:53 AM

97	There are some computers in the classroom that 1, the motion detectors have been knocked off and bypassed. 2, Some when started back up a sign comes on that says this computer will shut down and install automatically in x amount of minutes. the student using it might be in the middle of a test and lose all of the info. when it re starts. This happens in room 108 of TE7 as well as the computer lab in TE7. I should have reported it sooner but I did not, sorry. There is also 1 whole row of Computers in the computer lab in TE7 that has not had any power for quite a while. I should have reported it and didn't again, sorry.	Apr 25, 2012 9:05 AM

115	1) Our email is HORRIBLE, at least a 20-year-old design. I have worked in corporate America and education for more than 20 years, and this is the worst email system I have ever seen. There is NO reason we should not be migrating to Outlook or something similar, other than an adequate firewall. The attachment process is horrible and slow, everything about this system is outdated and inadequate. 2) We cannot download benign programs for simple applications because they are blocked. 3) No wireless on campus. Why is this? How is this possible? Most campuses are fully wireless everywhere on campus. 4) Telephone: why can't we have handsfree phones, so we can work and talk. There is so much more, but this is a start.	Apr 25, 2012 7:14 AM
116	Classroom equipment is unreliable, especially sound and streaming from online sources. classroom equipment is inconsistent from one room to another, meaning that you must prep differently for the same class in different rooms, have back up plans, and so forth. Need more voicemail capacity, more ability to install appropriate software on the computers.	Apr 25, 2012 6:59 AM
117	There have been far too many failures of e-mail in the last few years. Security breaches aren't noticed by ITS quickly allowing problems to spin out of control. Staff is unavailable evenings and weekends to deal with serious problems/network failures. In the past, staff were called in over weekends to deal with problems. We are receiving less service from ITS than ever before.	Apr 25, 2012 6:53 AM
