

You Have Choices

Though you may feel like you have no other choices . . . YOU DO! You are probably facing one of the most important choices of your life. Get the facts before you decide. Our staff can help you.

Parenting

When you feel like your career, education, financial stability or relationship is in jeopardy by this pregnancy, it is even harder to view parenting as a positive choice. But, your life isn't over!

Abortion

The decision to abort should not be made quickly or under pressure. Even though abortion seems like a quick fix there are physical, emotional and spiritual risks to abortion.

Adoption

The idea of carrying a child for 9 months and then placing the baby with another family may seem emotionally impossible. However, today adoption is very different than it was years ago. While confidential and semi-open adoption are still available, so is open adoption. In open adoption children grow up knowing that they are loved by both their adopted parents and the parents who gave them life.

Licensed Community Clinic
