

ORDER No. 2023-03 OF THE LOS ANGELES COUNTY HEALTH OFFICER

ORDER OF THE LOS ANGELES COUNTY HEALTH OFFICER

COVID-19 Reporting Requirements

Issue Date: Thursday, March 30, 2023
Effective at 12:01am on Monday, April 03, 2023

Brief Highlights:

3/30/2023:

- Continues the Los Angeles County Department of Public Health (LACDPH) requirements for the reporting of COVID-19 test results, hospitalizations, deaths, and clusters to LACDPH to allow for ongoing public health surveillance.

Please read this Order carefully.

Summary of the Order:

As the County of Los Angeles ends its COVID-19 emergency declarations on March 31, 2023, it remains important to continue public health surveillance¹ efforts to understand trends in COVID-19 infections, hospitalizations, and deaths and the impact they may be having in the community and within various sectors. Accordingly, this County Health Officer Order (Order) continues the requirement for laboratories to report COVID-19 test results and for providers to report COVID-19 hospitalizations and deaths. Although COVID-19 test results, hospitalizations, and deaths will continue to be reported to the Los Angeles County Department of Public Health (LACDPH), from a public health surveillance perspective, these individual reports do not provide sufficient context regarding the continued impact COVID-19 infections may have on various sectors within Los Angeles County. This is especially true with the wide availability and use of COVID-19 home test kits outside of a healthcare or laboratory testing facility. Consequently, this Order also continues the local COVID-19 cluster reporting requirements for healthcare facilities, skilled nursing facilities, community care facilities, worksites, residential congregate settings, and educational settings, as outlined in this Order. Reporting of clusters of COVID-19 cases to LACDPH will facilitate public health surveillance of COVID-19 and provision of rapid Public Health guidance to facilities and sites that may be experiencing a COVID-19 outbreak.

This Order is effective within the County of Los Angeles Public Health Jurisdiction, defined as all cities and unincorporated areas within the County of Los Angeles, except for the cities of

¹ *Public health surveillance* is defined as “the ongoing, systematic collection, analysis, and interpretation of health-related data essential to planning, implementation, and evaluation of public health practice.” Centers for Disease Control and Prevention (CDC). *Introduction to Public Health Surveillance*. Retrieved from <https://www.cdc.gov/training/publichealth101/surveillance.html>. Accessed on 3/29/2023.

Long Beach and Pasadena that must follow their respective City Health Officer orders and guidance. This Order is effective at 12:01 am on Monday, April 03, 2023.

**UNDER THE AUTHORITY OF CALIFORNIA HEALTH AND SAFETY CODE (HSC) SECTION 120175; CALIFORNIA CODE OF REGULATIONS (CCR), TITLE 17, SECTION 2501; AND LOS ANGELES COUNTY CODE, SECTION 11.04.010
THE COUNTY OF LOS ANGELES HEALTH OFFICER ORDERS:**

- 1) Purpose.** Although the state-wide emergency declaration has ended and the local emergency will soon end, COVID-19 continues to spread and pose a risk to persons within Los Angeles County. It remains important to maintain public health surveillance of COVID-19 infections, severe outcomes, and case clusters. This Order continues the requirement to report COVID-19 tests, hospitalizations, deaths, and clusters to LACDPH, which provides local situational awareness of any changes in infection patterns and levels. Rapid reporting also helps LACDPH provide prompt guidance to facilities and sites that are experiencing an outbreak among their patients, residents, or workers. The County Health Officer will continue to monitor data regarding the evolving scientific understanding of the risks posed by COVID-19, including the impact of vaccinations, and may amend or rescind this Order based on analysis of data and knowledge.
- 2) Intent.** The primary intent of this Order is to continue the COVID-19 testing, hospitalization, death, and cluster reporting requirements to allow for ongoing situational awareness of COVID-19. This Order does not alter any COVID-19 reporting obligation under California statutory or regulatory law.
- 3) Interpretation.** All provisions of this Order must be interpreted to effectuate the purpose and intent of this Order as described above. The summary at the beginning of this Order as well as the headings and subheadings of sections contained in this Order are for convenience only and may not be used to interpret this Order. In the event of any inconsistency between the summary, headings, or subheadings and the text of this Order, the text will control.
- 4) Facilities Subject to this Order.** This Order applies to the following facilities and sites within the County Public Health Jurisdiction, as detailed in this Section.
 - a) **Healthcare Facilities.** Healthcare Facilities subject to this Order include the following facilities or settings:
 - i) Acute Care Hospitals
 - ii) Acute Psychiatric Hospitals
 - iii) Chemical Dependency Recovery Hospitals
 - iv) Hospice Facilities
 - v) Respite Care Facilities
 - vi) Skilled Nursing Facilities
 - b) **Community Care Facilities.**

- i) Adult Residential Care Facilities, all license types
- ii) Continuing Care Retirement Communities
- iii) Intermediate Care Facilities of all license types, including those for the Developmentally Disabled
- iv) Psychiatric Health Facilities, including Acute Psychiatric Hospitals
- v) Residential Care Facilities for the Elderly
- vi) Residential Facility Chronically Ill
- vii) Social Rehabilitation Facilities
- viii) Long-Term Care Facilities
- ix) Congregate Living Health Facilities
- x) Residential Substance Use Treatment Facilities
- xi) Mental Health Treatment Facilities

c) **Workplace Settings.**

- i) Places of employment as defined in [Cal/OSHA COVID-19 Prevention Non-Emergency Regulations](#), section 3205(a)(2)(A)-(D).

d) **Residential Congregate Settings.**

- i) Shelters for Persons Experiencing Homelessness
- ii) Emergency Shelters
- iii) Correctional Facilities
- iv) Group Homes, Boarding Houses; Overnight Camps

e) **Educational Settings**

- i) Adult and Child Daycare Facilities
- ii) TK-12 Schools
- iii) Institutes of Higher Education (IHE) programs, colleges, universities, and trade and technical schools

5) Definitions. For purposes of this Order the following terms have the meanings given below:

a) **COVID-19 Case.** A person who:

- i) Has a positive viral test (i.e., a PCR or antigen test, including self-administered and self-read tests) for COVID-19 and/or
- ii) Has a positive COVID-19 diagnosis from a licensed healthcare provider.

b) **COVID-19.** COVID-19 means coronavirus disease 2019, the disease caused by the SARS-CoV-2 virus.

- c) **Linked COVID-19 Cases.** Cases that have had a close contact between persons as defined by the [Cal/OSHA COVID-19 Prevention Non-Emergency Regulations](#) or may include individuals who are members of the same risk cohort (for example, individuals were present at some point in the same setting during the same time period while they were infectious), even without an identified close contact.

6) Laboratory and Provider Reporting Requirements.

a) **All reporting laboratories must:**

- i) Report SARS-CoV-2 virus positive and non-positive test results (e.g., not detected, inconclusive, and specimen unsatisfactory) to LACDPH, via electronic transmission.

b) **All reporting laboratories that are not reporting electronically must:**

- i) Register with the California Department of Public Health (CDPH) [Health Information Exchange \(HIE\) Gateway](#) and complete the enrollment process for [Infectious Disease Electronic Laboratory Reporting](#) within 1 week of receipt of this Order.
- ii) Initiate Electronic Laboratory Reporting immediately upon completion of the onboarding process.

c) **All hospitals must:**

- i) Designate a liaison with their facility to coordinate and communicate with LACDPH regarding COVID-19.
- ii) Provide LACDPH a line list for all COVID-19 positive hospitalized inpatients, as detailed in the following reporting guidance:
<http://publichealth.lacounty.gov/acd/docs/HospCOVIDReportingGuide.pdf>

d) **All mandated reporters must:**

- i) Report COVID-19 hospitalizations and deaths, as required by California Code of Regulations, Title 17, section 2500 and the State Public Health Officer Order: <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Revision-of-Mandatory-Reporting-of-Covid-19-Results-by-Health-Care-Providers.aspx>. More details on how to report are available at <http://publichealth.lacounty.gov/acd/ncorona2019/reporting.htm>

7) COVID-19 Cluster Reporting Requirements for Various Sectors.

- a) **Cluster Reporting Methods for All Sectors:** Facilities in sectors outlined in section 7 subdivisions (b) through (e) below must report clusters of COVID-19 cases to LACDPH online at <http://www.redcap.link/covidreport> or by phone at 888-397-3993 or 213-240-7821. Educational settings should follow the unique reporting methods outlined in Section 7(f).

- b) **Healthcare Facilities.** The Facility must report within 24 hours when they know of at least two (2) Linked COVID-19 Cases identified in patients four or more days after admission (i.e. nosocomial cases) or three (3) Linked COVID-19 Cases among staff within a 14-day period.
- c) **Skilled Nursing Facilities and Community Care Facilities.** The Facility must report within 24 hours when they know of at least one (1) COVID-19 Case in a resident or three (3) Linked COVID-19 Cases among staff within a 14-day period.
- d) **Workplace Settings.** Employers are required to report within 24 hours when they know of at least three (3) Linked COVID-19 Cases among an exposed group of workers (employees, assigned or contracted workers, or volunteers) within a 14-day period.
- i) For large workplaces with more than 100 on-site workers, employers must also report when 5% of the workers are COVID-19 cases within a 14-day period, even if they are unlinked to each other.
- e) **Residential Congregate Settings.** Residential Congregate Settings must report within 24 hours when they know of at least three (3) Linked COVID-19 Cases among residents or staff
- i) For large settings with more than 100 persons present in the setting, the Facility must report when 5% of the persons present are COVID-19 cases within a 14-day period, even if they are unlinked to each other.
- f) **Educational Settings (TK-12 Schools, Early Care and Education (ECE), and Colleges and Universities).** Educational settings must notify LACDPH of all clusters of at least three (3) Linked COVID-19 Cases who were on campus at any point within the 14 days prior to illness onset date (school-associated cases). Cases include employees, children/students, and visitors.
- i) All site-associated COVID-19 clusters should be reported online through the secure web application, the Shared Portal for Outbreak Tracking (SPOT): https://spot.cdph.ca.gov/s/?language=en_US. All clusters with information for the cases should be reported to LACDPH immediately, and no later than 1 business day of being notified of the third, or last, case in the cluster. Educational settings that need assistance with reporting can contact: ACDC-Education@ph.lacounty.gov
- 8) **Obligation to Follow County Health Officer Orders and Directives and Mandatory State and Federal Rules.** All Facilities and Workplaces must follow any applicable orders of the County Health Officer and any applicable rules issued by state or federal authorities, including but not limited to Cal/OSHA regulations. Based on local health conditions, this Order may include a limited number of health and safety requirements that are more protective or more detailed than those contained under other rules. Employers must adhere to applicable Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace. In the event of a conflict between provisions of any County Health Officer Order and any order or rule, the provision that is more protective of health supersedes the conflicting, less protective provisions of the other order or rule.

**COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC HEALTH
ORDER OF THE HEALTH OFFICER**

- 9) Copies.** The County shall promptly provide copies of this Order by: (a) posting it on the Los Angeles Department of Public Health’s website (publichealth.lacounty.gov), (b) providing it to any member of the public requesting a copy, and (c) issuing a press release to publicize the Order throughout the County.
- 10) Severability.** If any subsection, sentence, clause, phrase, or word of this Order or any application of it to any person, structure, gathering, or circumstance is held to be invalid or unconstitutional by a decision of a court of competent jurisdiction, then such decision will not affect the validity of the remaining portions or applications of this Order.
- 11) Amendments to Order.** This Order may be revised in the future as the State Public Health Officer amends its guidance to reflect evolving public health conditions and recommendations issued by the federal Centers for Disease Control and Prevention (CDC) and other public health authorities. Should local COVID-19 conditions warrant, the County Health Officer may issue orders that are more protective than the guidance and orders issued by the State Public Health Officer.
- 12) Statutory Authority.** This Order is issued pursuant to California Health and Safety Code (HSC) section 120175; California Code of Regulations (CCR), Title 17, section 2501; and Los Angeles County Code, section 11.04.010.
- 13) Effective Date.** This Order shall become effective at 12:01am Monday, April 3, 2023, and will continue to be until it is revised, rescinded, superseded, or amended in writing by the County Health Officer.

IT IS SO ORDERED:

Issue Date

Los Angeles County Department of Public Health (LAC DPH) Guidelines for COVID-19 Cases (Isolation) and Close Contacts

Introduction

The Los Angeles County Department of Public Health (LAC DPH) has aligned with the new California Department of Public Health (CDPH) [Guidance on Isolation and Quarantine of the General Public](#). Effective March 13, 2023, the County Public Health Emergency Orders regarding isolation and quarantine for the general public have been rescinded and are replaced by these guidelines. This document outlines the precautions persons with COVID-19 and persons who are a close contact of a person with COVID-19 must take to prevent the spread of COVID-19 to others.

These guidelines apply to the general public. They are not intended for workplace settings (see “Workplaces” box below).

Summary of significant changes:

People with COVID-19:

- May leave isolation after Day 5 as long as they have been fever-free for 24 hours (without the use of fever reducing medicines) AND they either have no symptoms or their symptoms are mild and improving. A negative COVID-19 test is no longer required to leave isolation between Day 6-10. **LAC DPH strongly recommends that persons test negative prior to leaving isolation between Day 6-10.**
- Wear a well-fitting mask around others through Day 10. They may discontinue wearing a mask around others between Day 6-Day 10 if they have had two sequential negative COVID-19 tests taken at least one day apart.

Workplaces

Workplace settings are subject to the [Cal/OSHA COVID-19 Non-Emergency Regulations](#) or in some workplaces the [Cal/OSHA Aerosol Transmissible Diseases \(ATD\) Standard](#). Employers must review those regulations specific to controlling COVID-19 transmission in worksites to be in compliance with those applicable requirements. Additional information about how isolation and quarantine guidance affect covered workplaces may be found in [COVID-19 Prevention Non-Emergency Regulations FAQs](#). Refer to LA County [Responding to COVID-19 in the Workplace](#) for additional details.

In addition, Healthcare Facilities must follow the State AFL [Guidance on Quarantine for Health Care Personnel \(HCP\) Exposed to SARS-CoV-2 and Return to Work for HCP with COVID-19](#).

Los Angeles County Department of Public Health (LAC DPH) Guidelines for COVID-19 Cases (Isolation) and Close Contacts

Definitions

Isolation:

Separates those infected with a contagious disease from people who are not infected.

Confirmed case:

A person who has received a positive result of the presence of SARS-CoV-2 virus as confirmed by a COVID-19 viral test or clinical diagnosis.

Close contact:

A "Close Contact" is a person who has shared the same indoor airspace with someone with COVID-19 for a total of 15 minutes or more over a 24-hour period, while they were infectious.

Examples of indoor airspaces are homes, waiting rooms, airplanes. An example of "a total of 15 minutes or more" is being in the same airspace with the person for 5 minutes at least 3 different times in 24 hours.

Note: A different definition of a close contact is used for persons potentially exposed in very large indoor spaces.

Infectious period:

- *For symptomatic confirmed cases:* A person is considered infectious starting 2 days before their symptoms began (symptom onset date is Day 0) until their isolation ends (i.e., through Days 6-10 after symptoms first appeared **AND** 24 hours have passed with no fever, without the use of fever-reducing medications, and symptoms have improved).
- *For asymptomatic confirmed cases:* A person who never developed symptoms is considered infectious from 2 days before their positive test was taken (test collection date is Day 0) until their isolation ends (i.e., through Day 5).

These infectious periods are used to identify close contacts and possible exposures. Confirmed cases are no longer considered to be within their infectious period once they have met the criteria to leave isolation. However, confirmed cases must continue to follow all isolation precautions through Day 10.

People with symptoms of possible COVID-19

All people with symptoms of possible COVID-19 infection, regardless of vaccination status or previous infection, should stay home away from others and test for COVID-19. See LAC DPH COVID-19 guidance: [Learn about Symptoms and What to do If you are Sick.](#)

Los Angeles County Department of Public Health (LAC DPH) Guidelines for COVID-19 Cases (Isolation) and Close Contacts

Guidelines for Confirmed COVID-19 Cases

Everyone with a COVID-19 infection must isolate, regardless of their vaccination status, history of previous infection, or lack of symptoms.

To count the days:

- For people with symptoms, Day 0 is the first day of symptoms.
- For people with a positive COVID test who never develop symptoms, Day 0 is the day the first positive test was collected. Note, if they start to have symptoms, their new Day 0 is the first day of symptoms.

1. Isolate (Stay Home)

Stay home and away from others through at least Day 5. While in isolation, follow the full isolation instructions to protect others. See isolation instructions (available in multiple languages) at ph.lacounty.gov/covidisolation.

Ending isolation:

- A person may end isolation after Day 5 (i.e., between Day 6-10) if both of the following criteria are met*:
 - They have had no fever for at least 24 hours without the use of fever reducing medicine **AND**
 - Other symptoms are not present, or symptoms are mild and improving.
- *It is strongly recommended that an individual test negative for COVID-19 prior to ending isolation between Day 6 and Day 10. This would reduce the chance of infecting another person with COVID-19.
- People who continue to have symptoms of COVID-19 that are not improving must continue to isolate until their symptoms are improving or until after Day 10.
 - People who have left isolation and have a return or a worsening of their COVID-19 symptoms should re-test (with an antigen test). If they test positive, they need to re-start isolation at Day 0.

2. Wear a well-fitting mask

- While in isolation, wear a well-fitting mask if there is a need to be in the same room with others.
- Continue to wear a well-fitting mask around others through Day 10. People who meet the criteria to leave isolation after Day 5 may stop wearing their mask sooner (between Day 6-10) if they have two sequential negative COVID-19 tests taken at least one day apart.

3. Tell close contacts

- Close contacts should be informed that they may be infected. They should follow instructions for close contacts at: ph.lacounty.gov/covidcontacts.

See full instructions for people with COVID-19 at ph.lacounty.gov/covidisolation.

Los Angeles County Department of Public Health (LAC DPH) Guidelines for COVID-19 Cases (Isolation) and Close Contacts

Guidelines for Close Contacts

As long as a close contact does not have symptoms, they do not need to stay away from others. They should take steps to lower the risk of spreading COVID-19 to others.

To count the days: Day 0 is the day of your last contact (exposure) with the infected person.

Close contacts:

1. Wear a well-fitting mask indoors around others through Day 10.

- This is especially important when near those at higher risk for severe COVID-19 disease.

2. Test for COVID-19 within 3-5 days after last exposure

- In addition, testing as soon as possible after exposure is recommended for persons who live with or who are at [higher risk for severe illness](#). Early knowledge of infection status enables (a) earlier access to treatment options, if indicated (for those who may be at risk for severe illness), and (b) notification of close contacts who may also benefit by knowing if they are infected. If testing negative before Day 3, retest during the 3–5 day window following exposure, with at least 24 hours between the first and second test.
- Note: Close contacts who were previously infected with COVID-19 in the last 30 days do not need to test unless symptoms develop. Close contacts who were previously infected with COVID-19 in the past 31-90 days should use an antigen test to lower the risk of false positives.
- If the test result is positive, they must stay home away from others and follow the isolation instructions above for a confirmed COVID-19 case.

3. Monitor their health through Day 10

- If symptoms develop, stay home away from others and test right away.
- If the test result is positive, they must stay home away from others and follow the isolation instructions for a confirmed COVID-19 case.

See full instructions for close contacts at: ph.lacounty.gov/covidcontacts.

ORDER OF THE HEALTH OFFICER FOR CONTROL OF COVID-19

SARS-CoV-2 Data Sharing and Reporting

Order Issued: September 27, 2021

This Order is in effect until rescinded by the Health Officer.

Summary: California and local law empower the County of Los Angeles Health Officer (Health Officer) to take preventive measures necessary to protect the public from a public health hazard due to infectious disease including during a State of Emergency. The spread of COVID-19 poses a substantial danger to the health of the public of Los Angeles County. This Health Officer Order is issued with the intent of strengthening COVID-19 surveillance and reporting activities, which can help to slow the spread of this deadly disease.

COVID-19 is caused by a coronavirus known as SARS-CoV-2. Whole genome sequencing (WGS) (i.e., determining the virus' complete DNA sequence) and molecular testing of this virus provide high-resolution data that are instrumental to efforts to investigate viral pathogen genomes; understand outbreaks; monitor re-infection events; and identify mutations that may affect transmissibility, diagnosis, and medical countermeasures. Analysis of SARS-CoV-2 WGS data has led to important findings that have contributed to the development of diagnostic, treatment, control, and mitigation efforts. For example, WGS has been used to identify specific virus strains that are associated with outbreak clusters, develop molecular assays for COVID-19 testing, and guide the development of therapeutics and vaccines. Results of WGS and molecular testing can also impact public health decision making.

This Health Officer Order requires entities that are performing SARS-CoV-2 sequencing and molecular testing on specimens collected from residents of the Los Angeles County Public Health Jurisdiction to register with the Los Angeles County Department of Public Health (LAC DPH), report information about sequenced samples as directed, report findings of public health significance, and submit specimens upon request. It also encourages these entities to provide public access to WGS data. The World Health Organization (WHO) strongly supports making these data publicly available, to strengthen research efforts and inform public health decision-making during outbreaks.¹

UNDER THE AUTHORITY OF CALIFORNIA HEALTH AND SAFETY CODE SECTIONS 101040, 101085, AND 120175, THE HEALTH OFFICER ORDERS THE FOLLOWING:

1) Registration with the Los Angeles County Department of Public Health

Any research or diagnostic laboratory, academic institution, or other entity ("Entity") that is performing whole genome sequencing for SARS-CoV-2 (COVID-19) and/or Polymerase Chain Reaction (PCR), molecular, or sequencing-based surveillance for variants of SARS-CoV-2 (COVID-19) on patient specimens collected from residents of the Los Angeles County Public Health Jurisdiction must register with LAC DPH within 14 days of the issuance of this Order and thereafter, annually submit updated registration information per instructions provided by LAC DPH.

2) **SARS CoV-2 Sequences and Findings of Urgent Public Health Concern**

Effective immediately, any research or diagnostic laboratory, academic institution, or other entity (“Entity”) that is performing whole genome sequencing for SARS-CoV-2 (COVID-19) and/or PCR, molecular, or sequencing-based surveillance for variants of SARS-CoV-2 (COVID-19) on patient specimens collected from residents of the Los Angeles County Public Health Jurisdiction must, upon request, provide LAC DPH with information regarding sequenced samples, including associated patient information when available. Entity must provide any sequencing results that are requested, including results from specimens that were sequenced prior to issuance of this Health Officer Order. When requested, the Entity must report this information in an electronic format specified by LAC DPH, per the timeline specified by LAC DPH.

The Entity must report any suspected outbreak of COVID-19 that is identified based on coordinated specimen collection, detection of clusters of closely related specimens, or other analyses. The Entity must also report findings of urgent public health concern, including but not limited to, the Entity’s first identification of a known [variant of concern, interest, and/or high consequence](#) in Los Angeles County. These findings must be reported within 1 working day to LAC DPH by phone (888-397-3993 or 213-240-7821) or electronically per instructions provided by LAC DPH.

3) **Submission of SARS-CoV-2 Specimens**

Effective immediately, if requested, any research or diagnostic laboratory, academic institution, or other entity (“Entity”) that identifies SARS-CoV-2 (COVID-19) from patient specimens collected from residents of the Los Angeles County Public Health Jurisdiction is required to submit specimens to the LAC DPH Public Health Laboratories. Entity must include specimen CT or RLU value and identifiable patient information related to the specimen submission such as name, date of birth, date of collection, medical record number, address of residence, email address, and phone number when available.

4) **Whole Genome Sequencing Data Repository**

Any research or diagnostic laboratory, academic institution, or other entity (“Entity”) that is performing whole genome sequencing for SARS-CoV-2 (COVID-19) on specimens collected from residents of the Los Angeles County Public Health Jurisdiction is strongly encouraged to make the WGS data publicly accessible. When sequence data meet acceptance standards for upload, the Entity should upload de-identified complete viral genomic sequence data within 7 days of the date that they become available into, at a minimum, the following publicly accessible repositories:

- Global Initiative on Sharing All Influenza Data ([GISAID](#)). When uploading sequences into GISAID, the metadata file should include “Location” column field information to the County level (i.e., North America / USA / California / Los Angeles County).
- National Center for Biotechnology Information ([NCBI](#)) GenBank. When uploading sequences into GenBank, the Entity should select SARS-CoV-2 submission and during the Source Modifier step, specify “USA: California, Los Angeles County” in the “Country” column.

**COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC HEALTH
ORDER OF THE HEALTH OFFICER**

For each sequence submitted, within 7 days of the date that results become available, Entity should submit the GISAID and GenBank accession number, along with specified corresponding patient identifiers when available, to LAC DPH electronically per instructions provided by LAC DPH.

These actions are required because they will enable the Los Angeles County Department of Public Health and other stakeholders to identify which SARS-CoV-2 virus strains are spreading locally, in the state, and in the nation, which will support the development of targeted strategies, diagnostics, and therapeutics.

5) Additional Terms

- a. If any subsection, sentence, clause, phrase, or word of this Order or any application of it to any person, structure, gathering, or circumstance is held to be invalid or unconstitutional by a decision of a court of competent jurisdiction, then such decision will not affect the validity of the remaining portions or applications of this Order.
- b. The violation of any provision of this Order constitutes an imminent threat and creates an immediate menace to public health, safety, and welfare. To protect the public's health, the County Health Officer may take additional action(s) for failure to comply with this Order.
- c. Violation of this Order is a misdemeanor punishable by imprisonment, fine or both under California Health and Section Code Section 120275 et seq and Los Angeles County Code Section 11.02.080.

This Order will remain in effect until rescinded, superseded, or amended in writing by the Health Officer.

If you have any questions about this Order, please call the LAC DPH Public Health Laboratories Director at (562) 658-1330.

For updated COVID-19 guidance and reference documents, please visit the LAC DPH website: <http://ph.lacounty.gov/Coronavirus>.
