

Antelope Valley Community College District

Local Funding for Student Success

Fostering Success at Antelope Valley College

Antelope Valley College provides high-quality, affordable higher education for local students, professionals and returning veterans. AVC offers outstanding academic programs that provide crucial job training and allow students to transfer to the best four-year universities.

Updated Classrooms and Facilities Are Needed to Prepare Students for Future Success

Many of the classroom and student service facilities at AVC have not been updated in over 50 years. Academic facilities need safety upgrades, roof repairs and other improvements to meet modern job-training, technological and safety standards – and keep AVC in good condition for years to come.

Providing Resources for Educational Excellence

The Antelope Valley Community College District Board of Trustees has placed a bond measure on the November 2016 ballot to improve college facilities and student resources:

- ▲ Replace outdated classrooms and facilities to meet the needs of 21st century students
- ▲ Repair or replace leaky roofs, heating, cooling, plumbing and electricity throughout the aging classroom buildings
- ▲ Update technology and maintain technology updates as needed
- ▲ Upgrade math, engineering, aerospace and advanced manufacturing classrooms and labs
- ▲ Expand rapid job training programs to prepare students for local aerospace, engineering and manufacturing jobs
- ▲ Improve educational resources for student services to include returning veterans
- ▲ Expand joint-use and concurrent enrollment opportunities for area high school students by partnering with area K-12 districts
- ▲ Expand programs and upgrade AVC facilities in Lancaster and Palmdale to support high quality instruction and prepare students for jobs and to transfer to four-year universities

High-Quality Education for Years to Come

AVC is proud to provide fast-paced job training programs for local students and professionals, but many educational facilities need upgrades to provide students with the 21st century skills required for jobs in aerospace, engineering, manufacturing, health or other local industries.

Fiscal Accountability

- ▲ All funds would be spent in Antelope Valley and could not be taken away by the state
- ▲ Passage of a bond measure would allow the Antelope Valley Community College District to qualify for potential state and federal matching funds that would otherwise go to other communities
- ▲ An independent oversight committee and regular audits would ensure all funds are spent as promised

Public input is welcome. For more information, please contact the Office of Public Information at (661) 722-6300 ext. 6312.
