Since the peak of AVC's enrollment in 2008-2009 there has been a 26.1% decrease in annual enrollment. This decrease in enrollment is directly related to

severe budget cuts and workload reductions across the state and is not indicative of a lack of community need for education. Though resources have diminished, the workload of STAR has seen an increased rate of applications of 176%. This is related to student demand for priority registration, educational funding and tutoring.

There was a 3.5% cut in 2011 to the STAR grant, resulting in a decrease in travel funds for attending conferences and workshops for the director and counselor, student grant aid, supplies and campus events. Based on our services data and outcome assessment findings there is an apparent need for a larger program/work space. As cited in the STAR program review there is a need for a larger computer lab and study area as there is a high level of student participation with the program and utilization of services.
