Definition
Biology is the study of life. Biological and Environmental Sciences covers all aspects of the study of life and emphasizes both the unity and diversity of living things. Special emphasis is placed on the relationship between structure and function, progressing through molecular, cellular, organismic and ecological levels of complexity. Evolutionary relationships are explained and illustrated.

Branches of biology such as anatomy, physiology, microbiology, zoology, botany, and ecology are concerned with the application of biological principles to human affairs.

Program Description
This degree provides for the completion of general lower-division preparation associated with the requirements for a bachelor’s degree in biology, biochemistry, botany, ecology, forestry, zoology, microbiology, medicine and other fields. It provides a broad, comprehensive overview of the main areas of biological science. The ability to critically think and use appropriate tools to solve biological questions will be emphasized. The various courses within the biology program also satisfy general education requirements, and nursing/health occupations requirements. The program also meets the needs of students interested in improving their knowledge in biologically related fields such as agriculture and athletics. The biological sciences program includes: anatomy, biology, microbiology, and physiology.

Students must receive a minimum grade of “C” or better in all required core courses and the specific courses listed as program electives in order to qualify for the degree or certificate.

Distinctive Features
The biology and environmental sciences discipline stresses both theoretical and applied aspects of the life sciences. Extracurricular projects and field trips are regular features of some courses. Well-equipped labs are used to provide excellent training in practical biological techniques.

Career Options
Agricultural Biologist
Bacteriologist
Biologist
Biotechnologist
Botanist
Clinical Lab Technologist
Curator
Dental Hygienist
Dentist
Ecologist
Environmental Scientist
Fish/Game Warden
Food/Drug Inspector
Geneticist
Horticulturist
Industrial Hygienist
Marine Biologist
Medical Technologist
Parasitologist

Rebecca Miller 2379
Jason Newman 2507
Dr. Maryam Sanei 2454
Joshua Shipp 2300
Judy Sullivan 2278
Junko Suzuki 2322
Rachel Thibault 2416

V. M.
Suda Anunta 2204
Ashley Aparicio 2448
Kaitlin Bessinger 2506
Dr. Patricia Butterworth 2232
Lena Coleman 2227
Diana Doan 2638
Dang Huynh 2097
Osvaldo Larios-Perez 2487
Patricia Medina 2490
Physician
Physician’s Assistant
Pharmaceutical Sales
Physical Therapist
Physiologist
Public Health Technician
Registered Nurse
Teacher
Veterinarian
Wildlife Biologist
Zoologist

(Most of these careers require education beyond the two-year college level.)

Program Learning Outcomes

Associate in Science in Biology for Transfer
1. Demonstrate a practical working knowledge of the scientific method, and the ability to collect, evaluate, and analyze scientific data.
2. Demonstrate an understanding of the cell structure, function, and chemistry at the molecular, cellular, tissue, and organismal levels.
3. Develop an understanding of the interactive role of living organisms in ecosystems and the environment.
4. Examine and evaluate the role of evolution and natural selection at the cellular and organismal levels.
5. Demonstrate the ability to use laboratory equipment and methods safely and proficiently as an individual or as a group.

Associate in Science in Biology
1. Demonstrate a practical working knowledge of the scientific method, and the ability to collect, evaluate, and analyze scientific data.
2. Demonstrate an understanding of the cell structure, function, and chemistry at the molecular, cellular, tissue, and organismal levels.
3. Develop an understanding of the interactive role of living organisms in ecosystems and the environment.
4. Examine and evaluate the role of evolution and natural selection at the cellular and organismal levels.
5. Demonstrate the ability to use laboratory equipment and methods safely and proficiently as an individual or as a group.

Certificate Program
Certificate not applicable.

Associate Degree

Associate in Science in Biology for Transfer
Biology is the scientific study of life through the observation of structure, function, reproduction, growth, origin, evolution, and behavior of living organisms and their relation to each other and their environment. Biologists have deepened our understanding of processes and interactions on all levels of biological organization from elucidating cellular processes to fight cancer to assessing interactions in communities that might help prevent the extinction of species. Studying biology provides a background for students to evaluate and understand new discoveries and to make informed decisions about the use of scientific knowledge to benefit all living organisms.

The AS-T in Biology is designed to prepare students for transfer to a baccalaureate degree program in biology, particularly at the California State University.

The Associate of Science in Biology for Transfer (AS-T) prepares students for upper division biology courses, including general biology, cell or molecular biology, organism biology, marine biology, botany, zoology, ecology, evolution, genetics, anatomy, physiology, microbiology, and agricultural sciences.

To earn an Associate in Science in Biology for Transfer (AS-T in Biology) degree a student must complete the following:

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
   (A) The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth Requirements.
   (B) A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.

2. Obtainment of a minimum grade point average of 2.0.

ADTs also require that students must earn a “C” or better in all courses required for the major or area of emphasis.

*This degree may only be earned by completing the Intersegmental General Education Transfer Curriculum (IGETC) for STEM or the California State University General Education – Breadth Requirements for STEM. Please consult a counselor for additional information.

Required Courses: units
*BIOL 110, General Molecular Cell Biology 5
BIOL 120, General Organismal, Ecological and Evolutionary Biology 5

Required Electives A: units
Select 23 units from the following:
*CHEM 110, General Chemistry 5
CHEM 120, General Chemistry 5
*MATH 150, Calculus and Analytic Geometry 5
PHYS 101, Introductory Physics and
PHYS 102, Introductory Physics
OR
PHYS 110, General Physics and
PHYS 120, General Physics 8

*Courses denoted with an asterisk will fulfill the completion requirements for both the major and general education.
Biological and Environmental Sciences

Associate in Science in Biology

An associate in science degree with a major in Biological Sciences is available. In addition to the GE requirements, the student should complete 18 units of required biology course work, and sufficient elective credits to total 60 units. Students who intend to transfer are strongly encouraged to complete either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth (CSU GE) requirements. (See Graduation/Associate Degree Requirements and Transfer Information.)

Required Courses (10 units):

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>

<tbody>
<tr>
<td>MATH 140, Precalculus</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 101, 102, Introductory Physics</td>
<td>8</td>
</tr>
</tbody>
</table>

Completion of this degree is only a partial fulfillment of the requirements for transfer as a Biology major to an institution granting a baccalaureate degree. (See Graduation/Associate Degree Requirements.)

Transfer

Students planning to continue studies at a four-year college or university after AVC should visit the Transfer Resource Center and consult with a counselor as soon as possible. Additional information on official transfer articulation agreements from AVC to many CSU/UC campuses can be found at the following Web site: www.assist.org

Prerequisite Completion

If a course is listed as a prerequisite for another course, that prerequisite course must be completed with a satisfactory grade in order to enroll in the next course. According to Title 5, Section 55200(d), a satisfactory grade is a grade of “A,” “B,” “C” or “P.” Classes in which the Pass/No Pass option is available are indicated with an asterisk (*) before the course title. See “Pass/No Pass Option” in the catalog for full explanation.
BIOL 103  INTRODUCTION TO BOTANY
4 units
6 hours weekly
(3 hours lecture, 3 hours lab)
This is an introduction course in the study of plants. This course
deals with the structure of plants, how plants grow and function
and types of plants. Plant ecology and geography will also be
discussed. (CSU, UC, AVC)

BIOL 104  ENVIRONMENTAL BIOLOGY
3 units
3 hours weekly
Advisory: Eligibility for ENGL 101.
A general education biology course dealing with current
environmental issues. Topics include environmental
sustainability, ecological principles, human population impact,
energy, climate change, species extinction, pollution and toxic
wastes. (CSU, UC, AVC)

BIOL 110  GENERAL MOLECULAR CELL
5 units
7 hours weekly
(4 hours lecture, 3 hours lab)
Prerequisite: Completion of MATH 102 and CHEM 110.
Advisory: Completion of a general biology course is
recommended, and Eligibility for College Level Reading.
A comprehensive and in-depth introduction for all biology
majors (as well as physics, chemistry, engineering, computer
science, and math majors who will concern themselves with
biology) to the unifying principles of modern cellular biology,
molecular biology and biochemistry. Topics include the
structure of the atom, quantum mechanics, the nature of the
chemical bond, general principles of thermodynamics and
librium, prokaryotic and eukaryotic cell structure, lipid
chemistry and membrane biology, protein structure and function,
photosynthesis and cellular respiration, nucleic acids (DNA
and RNA) and their role in protein synthesis, principles of
classical and molecular genetics, the control of gene expression,
cell signalling systems, molecular embryology, evolutionary
developmental biology, and biotechnology. Lab work includes
investigations with live bacteria, protists, flowering plants and
fruit flies as model organisms, and includes experiments in
photosynthesis, enzymology, gel electrophoresis, genetics and
biotechnology. This course stresses evolutionary mechanisms.
(C-ID: BIOL 190) (CSU, UC, AVC)

BIOL 120  GENERAL ORGANISMAL,
ECOLOGICAL AND EVOLUTIONARY
BIOLOGY
5 units
7 hours weekly
(4 hours lecture, 3 hours lab)
Prerequisite: Completion of MATH 102.
Advisory: Completion of a general biology course and/or BIOL
110.
A comprehensive, in-depth course designed for biology majors
to complement the cell molecular perspective presented in
BIOL 110. A survey of unicellular and multicellular organisms,
emphasizing morphology, systematics, evolution, physiology,
heredity, development, behavior and ecology. Laboratories
consist of dissection and analysis of representative taxa and
student projects. Data analysis and preparation of scientific
reports are taught and applied to individual research projects. (C-
ID: BIOL 140) (CSU, UC, AVC)

BIOL 201  GENERAL HUMAN ANATOMY
4 units
8 hours weekly
(2 hours lecture, 6 hours lab)
Prerequisite: Completion of BIOL 100 or 101 or 102 or 110 or
120.
Advisory: Eligibility for College Level Reading.
Introduction to the structure and function of the human body.
Included are lectures and demonstrations using models,
isolated specimens and multimedia images of human anatomy.
Laboratory study includes demonstrations and dissections of a
cat and other animal and human material, including the cadaver.
Completion of this class requires full participation and use of all
lab materials. NOTE: This course is taken by students who wish
to enter the Associate Degree Nursing Program, students who
plan to combine their education in various healthcare fields, and
students who plan to transfer to four-year institutions to major in
biology. (C-ID: BIOL 110B) (CSU, UC, AVC)

BIOL 202  GENERAL HUMAN PHYSIOLOGY
4 units
6 hours weekly
(3 hours lecture, 3 hours lab)
Prerequisite: Completion of BIOL 201 and CHEM 101.
An analysis of basic processes of the human body, emphasizing
the coordinated physical and chemical mechanisms of cell
biology, neuromuscular, cardiovascular, respiratory, digestive,
skeletal, integumentary, immune, renal, endocrine and
reproductive systems. Includes work with computerized
instrumentation and living animals. Completion of this course
requires full participation and use of all laboratory
materials. NOTE: This course is necessary for students entering many
healthcare professions including the Associate Degree Nursing
Program. It is also applicable for transfer students in the
biological sciences. (C-ID: BIOL 120B) (CSU, UC, AVC)
BIOL 204  GENERAL MICROBIOLOGY

5 units
9 hours weekly
(3 hours lecture, 6 hours lab)

**Prerequisite:** Completion of BIOL 101 or 110 or 120, and CHEM 101.

**Advisory:** Completion of BIOL 201, BIOL 202, CHEM 102, COMM 103 and ENGL 101.

This course is designed to present an overview of the biology of microorganisms including bacteria, viruses, protozoa, fungi and helminths. Information is directed towards students in preprofessional programs for nursing, dental hygiene, surgical technology, physicians assistant, food science, environmental monitoring, animal and crop sciences as well as biological science majors. Wherever possible, new development in Biotechnology, Virology and Immunology are discussed to provide students with current knowledge in this important field of science. The laboratory introduces a broad spectrum of microorganisms and the concepts and techniques required to identify and classify unknown bacteria. (CSU, UC, AVC)

BIOL 205  *INTRODUCTION TO BIOTECHNOLOGY

3 units
5 hours weekly
(2 hours lecture, 3 hours lab)

**Prerequisite:** Completion of BIOL 110 or higher, and CHEM 101 or higher.

**Advisory:** Completion of BIOL 204.

The course will introduce the student to theoretical and applied concepts of Biotechnology- the use of living organisms or their products to enhance our lives and our environment. The content will cover the concepts of DNA structure, gene expression and protein synthesis. The laboratory techniques used in the Biotechnology industry will be learned and practiced by the students, including keeping a detailed lab notebook, learning and using calculations for solution preparation, preparing and analyzing DNA and protein samples by enzyme digest and gel electrophoresis, amplifying DNA by Polymerase Chain Reaction, and isolation of protein and DNA with separation techniques. Applications of these techniques in the Agricultural, Medical, Pharmaceutical and Forensic fields will be discussed. (CSU, UC, AVC)
