Definition
Engineering is concerned with the application of scientific and mathematical theories and principles to solve practical technical problems. The engineering discipline includes the Engineering Technology program for students who desire to work in jobs related to the engineering industry.

Staff
To access faculty and staff, dial (661) 722-6300, then the 4-digit extension.

Dean: Vacant
Administrative Assistant: Wendy Cios ext. 6415
Clerical Assistant III: Suzanne Olson ext. 6415
Department Chair: Dr. Alexandra Schroer ext. 6922

STEM
Christos Valiotis, Director ext. 6024
Jamie Jones, Coordinator ext. 6992
Christopher Bellingham, Lab Technician ext. 67074

Faculty:
Dr. Jonathan Compton ext. 6809

Adjunct Faculty:
To access adjunct faculty voice mail, dial (661) 722-6300, then the 4-digit number.

Program Description
The Engineering program at Antelope Valley College has three distinct components: 1) associate degree programs in Engineering for transfer to programs such as CSULB-AV; 2) a certificate program in Engineering Technology; and 3) associate degree program in Engineering Technology. (Engineering Transfer Agreement Pathway-ETAP)

Students must receive a minimum grade of “C” or better in all required core courses and the specific courses listed as program electives in order to qualify for the degree or certificate.

Distinctive Features
The Engineering program offers the student challenging and rewarding classes that transfer to four-year universities in California. The Engineering courses listed under the Associate Degrees in each engineering area should suffice for those specific engineering majors, and possibly those beyond transferring to a major university. See a counselor for specific details and general education requirements.

Career Options
Mechanical Engineering

Electrical Engineering
Computer Engineering
Biomedical Engineering
Aerospace Engineering
Civil Engineering

and many more sub areas of engineering (see a counselor for details)
(Most of these careers require education beyond the two-year college level.)

Program Learning Outcomes

Electrical Engineering
1. Apply knowledge of math, science, and engineering to identify, define, and solve electrical engineering related problems.
2. Design and perform tests/experiments, analyze and interpret data, and prepare technical reports as a member of a group.
3. Effectively employ techniques, skills, and computational tools necessary for electrical engineering.

Mechanical Engineering
1. Apply knowledge of math, science, and engineering to identify, define, and solve engineering problems.
2. Communicate effectively and work efficiently in a team environment.
3. Design and perform tests/experiments, analyze and interpret data, and prepare technical reports.
4. Effectively employ techniques, skills, and computational tools necessary for engineering.

Engineering Technology
1. Students will plan, create, test, and run their own programs in C code to solve typical programs.
2. Create multiple views, orientations, and reference frames for hand-drawn, and computer drawn models.
3. Design and construct drawings of basic circuits and electronics in computer aided design program.

Associate Degrees

Electrical Engineering
The Associate in Sciences in Electrical Engineering will provide students with a fundamental knowledge of Electrical Engineering, to enhance their computational and problem solving skills, sharpen their critical thinking, and to ensure proper preparation for junior level Electrical Engineering coursework at a university. Students completing this degree should realize that there are many sub disciplines in Electrical Engineering and most require a similar core education, but not all. The requirements for an associate degree in Electrical Engineering may be satisfied by completing the courses listed below in addition to the associate degree requirements. (See Graduation/Associate Degree Requirements.)

Required Courses: units
CIS 161, Introduction to C Programming 3
ENGR 110, Engineering Orientation and Basic Skills 3
ENGR 125, Programming and Problem Solving in MATLAB 4
ENGR 185, Digital Logic and Design 4
ENGR 230, Circuit Analysis 4
MATH 150, Calculus and Analytic Geometry 5
MATH 160, Calculus and Analytic Geometry 4
MATH 230, Introduction to Ordinary Differential Equations 4
MATH 250, Calculus and Analytic Geometry 4
PHYS 110, General Physics 4
PHYS 120, General Physics 4
PHYS 211, General Physics 5
Total 48

Except in cases of a prerequisite requirement, it is not required to take courses in exactly this sequence; they are recommended in this order to facilitate success.

**Recommended Plan of Study**

**First Semester**
- ENGR 110, Engineering Orientation and Basic Skills 3
- MATH 150, Calculus and Analytic Geometry (AVC GE D2) 5
- Course from GE requirement Area B 3
- Course from GE requirement Area D1 3
Total 14

**Second Semester**
- CIS 161, Introduction to C Programming (AVC GE E) 3
- ENGR 125, Programming and Problem Solving in MATLAB 4
- MATH 160, Calculus and Analytic Geometry 4
- PHYS 110, General Physics (AVC GE A) 4
Total 15

**Third Semester**
- ENGR 185, Digital Logic and Design 4
- MATH 160, Calculus and Analytic Geometry 4
- PHYS 120, General Physics 4
- Course from GE requirement Area C 3
Total 15

**Fourth Semester**
- ENGR 210, Statics 4
- MATH 250, Calculus and Analytic Geometry 4
- Course from GE requirement Area B 3
- Course from GE requirement Area F 3
Total 16

**Degree Total 60**

---

Chemical Engineering

The Associate in Sciences in Chemical Engineering will provide students with a fundamental knowledge of Chemical Engineering, to enhance their computational and problem solving skills, sharpen their critical thinking, and to ensure proper preparation for junior level Chemical Engineering coursework at a university. Students completing this degree should realize that there are many sub disciplines in Chemical Engineering and most require a similar core education, but not all. The requirements for an associate degree in Chemical Engineering may be satisfied by completing the courses listed below in addition to the associate degree requirements. (See Graduation/Associate Degree Requirements.)

**Engineering Technology**

(Currently not accepting new applicants for this major)

The requirements for an associate degree in Engineering Technology may be satisfied by completing the certificate program in addition to the associate degree requirements. (See Graduation/Associate Degree Requirements.)
Students who complete the associate degree in Engineering Technology will have drafting and programming skills of value in all fields of engineering and applied technologies including aerospace manufacturing, construction technology, public works, and industrial research and development. They will have entry level skills that would serve as a foundation for advancement in their field of employment. Moreover, the associate degree will also provide students with a broad range of knowledge with which: to evaluate and appreciate the physical environment, the culture, and the society in which they live; the ability to think critically; and the ability to communicate clearly and effectively.

Except in cases of a prerequisite requirement, it is not required to take courses in exactly this sequence; they are recommended in this order to facilitate success.

**Recommended Plan of Study**

**First Semester**
- ENGR 115, Basic Engineer Drawing 3 units
- DRFT 120, Intro. to 2-D AutoCAD 3 units
- MATH 128, College Algebra for Liberal Arts (AVC GE D2) 3 units
- Course from GE requirement Area B 3 units
- Course from GE requirement Area D1 3 units
- Total 15 units

**Second Semester**
- DRFT 125, Mechanical Drafting or DRFT 130, Architectural Draft. I 3 units
- DRFT 150, Intern. 2-D AutoCAD 3 units
- ELTE 125, Direct and Alternating Current Principles 5 units
- Course from GE requirement Area C 3 units
- Total 14 units

**Third Semester**
- CIS 161, Introduction to C Programming 3 units
- DRFT 240, Electronic Drafting 3 units
- Course from GE requirement Area F 3 units
- Program Electives 6 units
- Total 21 units

**Fourth Semester**
- Course from GE requirement Area A 3 units
- Course from GE requirement Area E 3 units
- Electives 10 units
- Total 16 units

**Degree Total** 60 units

**Computer Engineering**

The Associate in Sciences in Computer Engineering will provide students with a fundamental knowledge of Computer Engineering, to enhance their computational and problem solving skills, sharpen their critical thinking, and to ensure proper preparation for junior level Computer Engineering coursework at a university. Students completing this degree should realize that there are many sub disciplines in Computer Engineering and most require a similar core education, but not all. The requirements for an associate degree in Computer Engineering may be satisfied by completing the courses listed below in addition to the associate degree requirements. (See Graduation/Associate Degree Requirements.)

**Required Courses:**

**Units**
- MATH 150, Calculus and Analytic Geometry 5
- MATH 160, Calculus and Analytic Geometry 4
- MATH 250, Calculus and Analytic Geometry 4
- MATH 230, Introduction to Ordinary Differential Equations 4
- PHYS 110, General Physics 4
- PHYS 120, General Physics 4
- ENGR 110, Engineering Orientation and Basic Skills, 3
- CIS 121, Computer Mathematics 4
- ENGR 230, Circuit Analysis 4
- MATH 220, Linear Algebra 4
- CIS 250 Introduction to Python Programming 4
- CIS 111, Introduction to Programming and Algorithms 3
- CIS 113, Data Structures 3
- CIS 123, Assembly language and Computer Architecture 3
- CIS 161, Introduction to C Programming 3
- CIS 173, Introduction to C++ Programming 3
- CIS 175, Java Programming 3
- General Ed, Area A - Social & Behavioral Sciences 3
- General Ed, Area D1 - English Composition 3
- Total: 64 units

**First Semester**
- ENGR 110, Engineering Orientation and Basic Skills 3 units
- MATH 150, Calculus and Analytic Geometry 5 units
- General Ed, Area B - Social & Behavioral Sciences 3 units
- General Ed, Area D1 - English Composition 3 units
- Total: 14 units

**Second Semester**
- Program Electives 6 units
- MATH 160, Calculus and Analytic Geometry 4 units
- PHYS 110, General Physics 4 units
- Total: 14 units

**Third Semester**
- MATH 250, Calculus and Analytic Geometry 4 units
- MATH 250, Calculus and Analytic Geometry 4 units
- PHYS 120, General Physics 4 units
- CIS 121, Computer Mathematics 4 units
- CIS 161, Introduction to C Programming 3 units
- General Ed, Area C - Humanities 3 units
- Program Elective 3 units
- Total: 21 units

**Fourth Semester**
- MATH 220, Linear Algebra 4 units
- MATH 230, Introduction to Ordinary Differential Equations 4 units
- ENGR 230, Circuit Analysis 4 units
- General Ed, Area F - Diversity Studies 3 units
- Total: 15 units

**Degree Total** 64 units
Certificate Program

Engineering Technology
(CURRENTLY NOT ACCEPTING NEW APPLICANTS FOR THIS MAJOR)

The following courses (32 units minimum) are required for the certificate.

Required Courses: units

<table>

Transfer

Students planning to continue studies at a four-year college or university after AVC should visit the Transfer Resource Center and consult with a counselor as soon as possible. Additional information on official transfer articulation agreements from AVC to many CSU/UC campuses can be found at the following Web site: www.assist.org

Prerequisite Completion

If a course is listed as a prerequisite for another course, that prerequisite course must be completed with a satisfactory grade in order to enroll in the next course. According to Title 5, Section 55200(d), a satisfactory grade is a grade of “A,” “B,” “C” or “P.” Classes in which the Pass/No Pass option is available are indicated with an asterisk (*) before the course title. See “Pass/No Pass Option” in the catalog for full explanation.

Engineering Courses

ENGR 110 *ENGINEERING ORIENTATION AND BASIC SKILLS
3 units
3 hours weekly

Prerequisite: Completion of MATH 135.
The course explores the branches of engineering, the functions of an engineer, and the industries in which engineers work.

ENGR 115 *BASIC ENGINEERING DRAWING
3 units
6 hours weekly

Introductory engineering drawing covers lettering, use of instruments and rulers, applied geometry, sketching, sectional views, orthographic projection and auxiliary views. Computerized software will be introduced. This course is intended for vocational training leading to a certificate and a basic drawing background for engineers transferring to a university. (CSU, AVC)

ENGR 125 PROGRAMMING AND PROBLEM-SOLVING IN MATLAB
4 units
6 hours weekly
(3 hours lecture, 3 hours lab)

Prerequisite: Completion of MATH 150.
This course utilizes the MATLAB environment to provide students with a working knowledge of computer-based problem-solving methods relevant to science and engineering. It introduces the fundamentals of procedural and object-oriented programming, numerical analysis, and data structures. Examples and assignments in the course are drawn from practical applications in engineering, physics, and mathematics. (C-ID: ENGR 220) (CSU, UC, AVC)

ENGR 130 MATERIALS SCIENCE
3 units
3 hours weekly

Prerequisite: Completion of CHEM 110 and PHYS 110.
Corequisite: Concurrent enrollment in ENGR 130L.
This course presents the internal structures and resulting behaviors of materials used in engineering applications, including metals, ceramics, polymers, composites, and semiconductors. The emphasis is upon developing the ability both to select appropriate materials to meet engineering design criteria and to understand the effects of heat, stress, imperfections, and chemical environments upon material properties and performance. (C-ID: ENGR 140) (CSU, UC, AVC)

ENGR 130L MATERIALS SCIENCE LAB
1 unit
3 hours weekly

Corequisite: Concurrent enrollment in ENGR 130.
This course is the experimental exploration of the connections between the structure of materials and materials properties. Laboratories provide opportunities to directly observe the structures and behaviors discussed in the lecture course, to operate testing equipment, to analyze experimental data, and to prepare reports. (CSU, AVC)
ENGR 140  ENGINEERING 3D GRAPHICS
3 unit
6 hours weekly
Prerequisite: Completion of MATH 135 (AVC placement through multiple measures).
This course covers the principles of engineering drawings in visually communicating engineering designs and an introduction to computer-aided design (CAD). Topics include the development of visualization skills; orthographic projections; mechanical dimensioning and tolerancing practices; and the engineering design process. Assignments develop sketching and 2-D and 3-D CAD skills. The use of CAD software is an integral part of the course. (C-ID: ENGR 150) (CSU, UC, AVC)

ENGR 185  *DIGITAL LOGIC AND DESIGN
4 units
6 hours weekly
(3 hours lecture, 3 hours lab)
Prerequisite: Completion of MATH 102.
Advisory: Eligibility for ENGL 101 and READ 099.
This course covers discrete mathematics, logic Boolean algebra, binary arithmetic, logic gates, combinatorial logic, and minimization techniques. Includes an introduction to sequential circuits, state machines and synchronous state machine design. Students will design combinatorial circuits, flipflops, multivibrators, registers and counters. (CSU, UC, AVC)

ENGR 199  *OCCUPATIONAL WORK EXPERIENCE
1–8 units
hours vary
Prerequisite: To participate in work experience, students must have a job or internship which is either paid or voluntary and have the approval of the supervisor and instructor supervising work experience in the specific subject area. PRIOR TO ENROLLING, students must attend a scheduled orientation or meet individually with the supervising instructor for an individual orientation.
Occupational Work Experience Education is supervised employment designed to provide students a realistic learning experience through work. The ultimate goal is to teach students those skills and attitudes that will equip them to function and adapt as an employee in a variety of situations and jobs. Occupational Work Experience Education is supervised employment extending classroom-based occupational learning at an on-the-job learning station related to the students’ educational major or occupational goal. Credit may be accrued at the rate of one to eight units per semester. For the satisfactory completion of all types of Cooperative Work Experience Education (WE 197 and WE 199), students may earn up to a total of sixteen semester credit hours. (CSU, AVC) (R3)

ENGR 210  STATICS
4 units
4 hours weekly
Prerequisite: Completion of MATH 160 and PHYS 110.
A first course in engineering mechanics: properties of forces, moments, couples and resultants; two- and three-dimensional force systems acting on engineering structures in equilibrium; analysis of trusses, and beams; distributed forces, shear and bending moment diagrams, center of gravity, centroids, friction, and area and mass moments of inertia. Optional additional topics include fluid statics, cables, Mohr’s circle and virtual work. (C-ID: ENGR 130) (CSU, UC, AVC)

ENGR 215  DYNAMICS
3 units
3 hours weekly
Prerequisite: Completion of ENGR 210.
This course covers the fundamentals of kinematics and kinetics of particles and rigid bodies. Topics include kinematics of particle motion; Newton’s second law, work-energy and momentum methods; kinematics of planar motions of rigid bodies; work-energy and momentum principles for rigid body motion; Introduction to mechanical vibrations. (CSU, UC, AVC)

ENGR 220  *STRENGTH OF MATERIALS
3 units
3 hours weekly
Prerequisite: Completion of ENGR 210.
Corequisite: Concurrent enrollment in ENGR 220L.
Advisory: Concurrent enrollment in ENGR 220PS.
This course is a study of stresses, strains and deformations associated with axial, torsional and flexural loading of bars, shafts and beams, as well as pressure loading of thin-walled pressure vessels. The course also covers stress and strain transformation, Mohr’s Circle, ductile and brittle failure theories, and the buckling of columns. Statically indeterminate systems are also studied. (CSU, UC, AVC)

ENGR 220PS  *STRENGTH OF MATERIALS PROBLEM SOLVING SESSION
1 unit
1 hour weekly
Corequisite: Concurrent enrollment in ENGR 220.
Problem solving session for the ENGR 220 class, which reinforces the lecture topics. (CSU, AVC)
ENGR 220L  *STRENGTH OF MATERIALS LAB
1 unit
3 hours weekly
**Corequisite:** Concurrent enrollment in ENGR 220.
This is a laboratory course designed to accompany the ENGR 220 lecture course. This course will solidify concepts involving the study of stresses, strains and deformations associated with axial, torsional and flexural loading of bars, shafts and beams, as well as pressure loading of thin-walled pressure vessels. The course also covers stress and strain transformation, Mohr’s Circle, ductile and brittle failure theories, and the buckling of columns. Statically indeterminate systems are also studied. (CSU, AVC)

ENGR 230  CIRCUIT ANALYSIS
4 units
6 hours weekly
(3 hours lecture, 3 hours lab)
**Prerequisite:** Completion of PHYS 120.
**Corequisite:** Completion of or concurrent enrollment in MATH 230.
An introduction to the analysis of electrical circuits. Use of analytical techniques based on the application of circuit laws and network theorems. Analysis of DC and AC circuits containing resistors, capacitors, inductors, dependent sources, operational amplifiers, and/or switches. Natural and forced responses of first and second order RLC circuits; the use of phasors; AC power calculations; power transfer; and energy concepts. (CSU, UC, AVC)
