1. Students are advised to consult a counselor when selecting a Mathematics course.

2. New students are required to take an assessment test to determine initial course placement. See Student Success and Support Program for alternatives and exemptions.

3. Individualized Self-Study Mathematics MATH 099 is available for MATH 065, 070, or 102 to be taken for credit, one unit at a time.

4. Some courses below dotted line may not be transferable to certain four-year institutions. Consult Counselors/Transfer Center/4 yr. catalogs.
Definition
Mathematics is an important tool with which problems can be solved. Numbers, letters, or other symbols constitute the language of mathematics and, as in any language, are used to convey ideas and relationships especially in science. The final balance in a checkbook is a simple example of this relationship while landing astronauts on the moon reveals its complexity.

Program Description
A student may improve basic mathematical skills through remedial course work or prepare for transfer to a B.A or B.S. program in Mathematics, Physics, Chemistry, or Engineering.

Students must receive a minimum grade of “C” or better in all required core courses and the specific courses listed as program electives in order to qualify for the degree or certificate.

Distinctive Features
Courses in arithmetic and algebra provide the basic mathematical skills required in many fields. Statistics, linear algebra, calculus, and differential equations provide problem-solving tools for the physical and social sciences and engineering.

Math Labs: There is a math laboratory located in the Learning Center and additional support for math courses utilizing computer based instruction is found in The Prime Room, ME 100. Help in the Learning Center including tutoring is available on a drop-in basis. The Prime Room houses primarily Math 001, Individualized Self-Study courses. Students who are not enrolled in any of the Math 001 sections will have a limited access to this room. All math students are encouraged to utilize these learning resources.

Career Options
Actuary
Appraiser
Assessor
Program Learning Outcomes

AS in Mathematics and AS-T in Mathematics
1. Demonstrate computational mastery.
2. Solve mathematical problems, both computational and proof, independently.
3. Understand and apply algorithms to solve problems.
4. Model and analyze real world problems by reformulating them into mathematical context.
5. Recognize the interdependency of different areas in mathematics, and the connection between mathematics and other disciplines.

Certificate Program
Certificate not applicable.

Associate Degree

Mathematics
An associate degree with a major in Mathematics is available. A minimum of 29 units is required. Students who intend to transfer are strongly encouraged to complete either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth (CSU GE) requirements. (See Graduation/Associate Degree Requirements and Transfer Information.)

Required Courses: (29 units) units
MATH 150, Calc. & Analytic Geom. 5
MATH 160, Calc. & Analytic Geom. 4
MATH 220, Linear Algebra 4
MATH 230, Differential Equations 4
MATH 250, Calc. & Analytic Geom. 4
PHYS 110, General Physics 4
PHYS 120, General Physics or PHYS 211, General Physics 4-5

Associate in Science in Mathematics for Transfer
The Associate in Science in Mathematics for Transfer (AS-T in Mathematics) degree offers students a fundamental knowledge of Mathematics and its relation to science, technology, and engineering. Students will enhance their problem solving and critical thinking skills by applying mathematical models to real world problems or utilizing mathematical objects and theorems to evaluate the validity of a statement or to prove mathematical statements.

The Associate in Science in Mathematics for Transfer (AS-T in Mathematics) degree meets the requirements of SB 1440 for Associate Degrees for Transfer (ADT). These degrees are intended to make it easier for students to transfer to California State University campuses, but do not exclude admittance to other colleges or universities.

To earn an Associate in Science in Mathematics for Transfer (AS-T in Mathematics) degree a student must complete the following:
(1) Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
(A) The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth Requirements.
(B) A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
(2) Obtainment of a minimum grade point average of 2.0. ADTs also require that students must earn a C or better in all courses required for the major or area of emphasis.

Required Courses: units
*MATH 150, Calculus and Analytic Geometry 5
*MATH 160, Calculus and Analytic Geometry 4
*MATH 250, Calculus and Analytic Geometry 4

Choose a minimum of 8 units from the lists below with at least 4 units from A:

Required Electives A: units
MATH 220, Linear Algebra 4
MATH 230, Introduction to Ordinary Differential Equations 4

Required Electives B: units
*PHYS 110, General Physics 4
*MATH 116, Introduction to Statistics Using R or MATH 115, Statistics 4

*Courses denoted with an asterisk will fulfill the completion requirements for both the major and general education.
Except in cases of a prerequisite requirement, it is not required to take courses in exactly this sequence; they are recommended in this order to facilitate success.

*Electives should be taken from other courses within the discipline.*

**Mathematics Courses**

**MATH 001 INDIVIDUALIZED SELF-STUDY MATHEMATICS**  
1–12 units  
3-36 hours weekly

**Advisory:** AVC Math Assessment Test.  
(The Course Requisites for each class taken in MATH 001 are the same as those for the course named in the course description.)  
Individualized and self-paced study of the basic skills courses from Arithmetic to Intermediate Algebra in a supervised environment for the motivated student. These courses include MATH 065 (C, D, E, and F), MATH 070 (C, D, E, and F), and MATH 102 (C, D, E, and F). Students may choose from single unit courses: MATH 065C, 065D, 065E, 065F, 070C, 070D, 070E, 070F, 102C, 102D, 102E, 102F and enroll in only one unit at a time. Upon satisfactory completion of that unit, students may proceed to the next unit. At least four units must be completed in any academic year which also includes Winter and Summer sessions. The instructor will explain the unit system and assist students with selection of the appropriate unit course at the first class meeting. The instructor will also give initial orientation explaining testing, review tests to help students define what skills have been mastered, and refer students to readily available support services. Instructor does not lecture nor does he/she structure the pace of materials or determine when a student needs to proceed other than by setting deadlines for completion of one unit. Regular attendance is expected. Grading for MATH 065C through 070F is P (for pass) and NP (for no-pass). Students will earn letter grades A, B, C, D, or F in Math 102C through 102F. Letter grade I (incomplete) will not apply to MATH 001 sequence.

**MATH 020 MANAGING MATH ANXIETY**  
.5 unit  
9 hours total

**Advisory:** Eligibility for ENGL 100A and READ 095.

Designed to provide students with the skills to reduce math frustration by diagnosing social causes and educational contexts and overcoming math myths and misconceptions. This course will also cover the following skills: recognizing math anxiety, developing various coping skills which include relaxation and wellness techniques, and becoming aware of personal learning style preferences for math. Math-specific testing skills will be taught using currently adopted texts for MATH 065 and MATH 070. **NOTE:** No grade will be given for this class; student will receive “pass” or “no pass” only. (Credit course not applicable to the associate degree and certificate programs.)

**Transfer**

Students planning to continue studies at a four-year college or university after AVC should visit the Transfer Resource Center and consult with a counselor as soon as possible. Additional information on official transfer articulation agreements from AVC to many CSU/UC campuses can be found at the following Web site: [www.assist.org](http://www.assist.org)

**Prerequisite Completion**

If a course is listed as a prerequisite for another course, that prerequisite course must be completed with a satisfactory grade in order to enroll in the next course. According to Title 5, Section 55200(d), a satisfactory grade is a grade of “A,” “B,” “C” or “P”. Classes in which the Pass/No Pass option is available are indicated with an asterisk (*) before the course title. See “Pass/No Pass Option” in the catalog for full explanation.
MATH 021 MATH STUDY STRATEGY
1 unit
18 hours total
Advisory: Eligibility for ENGL 100A and READ 095.
Designed to assist students in improving their math study skills so they can develop appropriate study strategies for math classes. Various methods and techniques will be explored including: developing a math textbook study system, math textbook annotating, math lecture note taking, listening, math problem solving strategies, test preparation, test taking strategies, relating learning preferences to math, and effective memory techniques. Time management at test time and identifying available campus resources for math will also be presented. NOTE: No grade will be given for this class; student will receive “pass” or “no pass” only. (Credit course not applicable to the associate degree and certificate programs.)

MATH 065 BASIC MATH
4 units
4 hours weekly
Advisory: Eligibility for ENGL 100A.
This course is intended to prepare students for beginning algebra and college level courses and programs. It covers basic operations with whole numbers, rational numbers and integers. Students will learn how to solve proportions, percent problems and find perimeter, area, and volume of basic geometric figures and solids. Students will be introduced to the language of algebra and learn how to evaluate algebraic expressions and solve first degree equations. MATH 065 is not a transferable course and does not satisfy GE requirements. NOTE: No grade will be given for this class; student will receive “pass” or “no pass” only. (Credit course not applicable to the associate degree and certificate programs.)

MATH 070 ELEMENTARY ALGEBRA
4 units
4 hours weekly
Prerequisite: Eligibility for MATH 070 (AVC assessment) or Completion of MATH 065.
Advisory: Eligibility for READ 099.
This course is for the student who has had some previous training in algebra. Topics in Math 070 include operations with signed numbers, variables, algebraic expressions, linear equations, word problems, exponents, polynomials, special products, factoring, algebraic fractions, graphing, systems of equations, and graphing linear equations in two variables. NOTE: No grade will be given for this class; student will receive “pass” or “no pass” only. (Credit course not applicable to the associate degree and certificate programs.)

MATH 102 *INTERMEDIATE ALGEBRA
4 units
4 hours weekly
Prerequisite: Eligibility for MATH 102 (AVC assessment) or Completion of MATH 070.
Advisory: Eligibility for READ 099.
This course is for the student who has been very successful completing Elementary Algebra and who is comfortable taking math classes. Topics include: Radical Expressions and Equations, Quadratic Equations and their graphs, Circles, Introduction to Functions, Systems of Linear Equations and Inequalities, Compound and Absolute Value Inequalities, Exponential and Logarithmic Functions, and word problems appropriate to all these topics. (AVC)

MATH 105 METHODS OF PROOF FOR PRECALCULUS
3 units
3 hours weekly
Prerequisite: Eligibility for MATH 105 (AVC assessment) or Completion for MATH 102.
Advisory: Eligibility for READ 099.
This course is designed to give STEM students an introductory overview, appreciation, and understanding of the role of theorem and proof in mathematics in preparation for the calculus sequence and beyond. Emphasis is placed on identifying the components of a mathematical system and the logical sequencing and formal proof of mathematical statements within a mathematical system. Students will get extensive practice with methods of direct and indirect proof, proof by math induction, and analytic geometry proofs in a variety of precalculus mathematical systems involving geometric figures, numbers, sets, and functions. (CSU, AVC)

MATH 110 MATHEMATICS FOR LIBERAL ARTS STUDENTS
3 units
3 hours weekly
Prerequisite: Completion of MATH 102.
Advisory: Eligibility for College Level Reading.
This is a survey of mathematics course and is designed for students who are taking mathematics for liberal arts majors or as a fulfillment of their general education requirements. The course is a survey of mathematical topics that introduces the art, history, and applications to a general audience. Students will appreciate mathematics through exploration of a wide range of applications in physical and social sciences, and also via its unparalleled and often surprising appearance in humanities. (CSU, AVC)

MATH 115 STATISTICS
4 units
4 hours weekly
Prerequisite: Completion of MATH 102.
Advisory: Eligibility for College Level Reading.
The use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision-making. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-square and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Applications using data from disciplines including business,
social sciences, psychology, life science, health science, and education. (C-ID: MATH 110) (CSU, UC, AVC)

**MATH 116 INTRODUCTION TO STATISTICS USING R**
4 units
4 hours weekly
**Prerequisite:** Completion of MATH 102 (AVC Assessment).
**Advisory:** Eligibility for College Level Reading.
This course introduces students to statistical thinking and literacy through the analysis of large real data bases using robust statistical computer software. Students will be introduced to the common traditional statistical methods taught in an introductory statistics course using the statistical software R. Probability techniques, hypothesis testing, and predictive techniques will be used to facilitate decision-making. Topics will include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi square and t tests. Results will be reported using R-markdown authoring in the RStudio program. (CSU, UC, AVC)

**MATH 120 *MATH FOR TEACHERS***
3 units
3 hours weekly
**Prerequisite:** Completion of MATH 102.
**Advisory:** Eligibility for College Level Reading.
This course is designed to provide students with a deep conceptual understanding of the mathematics taught at the elementary and middle school level. Topics covered included problem-solving skills, the structure of the real number systems, other numeration systems, basic number theory, set theory, and use of manipulatives. Additionally, students will look at the Common Core State Standards and how these standards are applied in the content covered in class. (CSU, UC, AVC)

**MATH 124 FINITE MATH**
4 units
4 hours weekly
**Prerequisite:** Completion of ENGL 100A and MATH 102.
**Advisory:** Eligibility for College Level Reading.
Finite Math is designed for students interested in business, social and behavioral sciences. Topics include Linear Functions, Matrices, Linear Programming, Mathematics of Finance, Sets and Logic, Probability, Statistics, and Markov Chains. (C-ID: MATH 130) (CSU, UC, AVC)

**MATH 128 *COLLEGE ALGEBRA FOR LIBERAL ARTS***
3 units
3 hours weekly
**Prerequisite:** Eligibility for MATH 128 (AVC assessment) or Completion of MATH 102.
**Advisory:** Eligibility for College Level Reading.
A college-level course in algebra for non-STEM or liberal arts majors covering the properties and graphs of polynomial, rational, radical, absolute value, and exponential and logarithmic functions; solutions and applications of equations and systems of equations and inequalities from these functions; linear programming; and introduction to matrices and determinants in solving linear systems. (This course will not satisfy the algebra prerequisite for the calculus sequence.) (C-ID: MATH 150) (CSU, UC, AVC)

**MATH 135 *PLANE TRIGONOMETRY***
3 units
3 hours weekly
**Prerequisite:** Completion of MATH 102 or Eligibility for MATH 135 (AVC Assessment).
**Advisory:** Concurrent enrollment in MATH 105, Eligibility for ENGL 101 and College Level Reading.
This course is for the student who is preparing for calculus, physics, engineering, and other applications requiring trigonometry. Topics include the trigonometric functions, basic identities, inverse trigonometric functions, solutions of triangles, trigonometric equations, and introduction to vectors. (CSU, UC, AVC)

**MATH 140 *PRECALCULUS***
4 units
4 hours weekly
**Prerequisite:** Completion of MATH 128 or MATH 124.
**Advisory:** Eligibility for College Level Reading.
Calculus for Business & Economics is a course designed for students in business, management, economics, and social sciences who require more advanced mathematics. The course emphasizes on applications of derivatives and integrals. Topics include functions, limits, continuity, graphing, and differentiation, and integration. (C-ID: MATH 140) (CSU, UC, AVC)

**MATH 148 CALCULUS FOR BUSINESS & ECONOMICS**
4 units
4 hours weekly
**Prerequisite:** Completion of MATH 128 or MATH 124.
Calculus for Business & Economics is a course designed for students in business, management, economics, and social sciences who require more advanced mathematics. The course emphasizes on applications of derivatives and integrals. Topics include functions, limits, continuity, graphing, and differentiation, and integration. (C-ID: MATH 140) (CSU, UC, AVC)

**MATH 150 CALCULUS AND ANALYTIC GEOMETRY**
5 units
5 hours weekly
**Prerequisite:** Completion of MATH 140 or Eligibility for MATH 150 (AVC Assessment).
Advisory: Eligibility for College Level Reading.
This course is for the student planning upper-division work in math, physics, engineering or business. It involves differentiation and integration of algebraic, trigonometric, exponential, and logarithmic functions. Applications include extrema, graphing, related rates, area. (C-ID: MATH 900S) (CSU, UC, AVC)

MATH 160  CALCULUS AND ANALYTIC GEOMETRY
4 units
4 hours weekly
Prerequisite: Completion of MATH 150.
Advisory: Eligibility for College Level Reading.
This course is a continuation of Math 150. It includes applications of integration, integration techniques, indeterminate forms, improper integrals, infinite series, and topics in analytic geometry. (C-ID: MATH 220, MATH 900S) (CSU, UC, AVC)

MATH 220  LINEAR ALGEBRA
4 units
4 hours weekly
Prerequisite: Completion of MATH 160.
Advisory: Eligibility for College Level Reading.
This is an introductory course in linear algebra, designed for transfer students majoring in the mathematical, biological, physical, engineering, sociological or managerial sciences. Topics to be covered include systems of linear equations, matrices, determinants, vector spaces, inner product spaces, linear transformations, eigenvalues and eigenvectors. This course will include references to applications of the above topics in the areas of differential equations, least squares fitting to data, geometry of linear operators on R2, diagonalizing quadratic forms and conic sections. (C-ID: MATH 250) (CSU, UC, AVC)

MATH 230  INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS
4 units
4 hours weekly
Prerequisite: Completion of MATH 160.
Advisory: Completion of MATH 220 and MATH 250, and Eligibility for College Level Reading.
This is an introduction course in solving numerous types of ordinary differential equations including first order linear and nonlinear equations, higher order linear equations, systems of linear equations, and the associated initial value problems. In addition to the standard methods, the Laplace transform, power series method, and matrix method are covered. Applications of differential equations in physics, chemistry, economics and social sciences will be studied throughout the course. (CSU, UC, AVC)

MATH 250  CALCULUS AND ANALYTIC GEOMETRY
4 units
4 hours weekly
Prerequisite: Completion of MATH 160.
Advisory: Eligibility for College Level Reading.
This course is a continuation of MATH 160. Includes vector theory and the geometry of 3-dimensional space, vector-valued functions, functions of several variables, partial differentiation, multiple integration and vector analysis. (CSU, UC, AVC)
