

# What Can I Do with This Major?

## Air Conditioning and Refrigeration

Air Conditioning and Refrigeration, a constantly changing program designed to satisfy the mechanically oriented person. Introducing entry level skills in this rapidly growing service industry. A Student may specialize in air conditioning, refrigeration, or both (recommended.) The program is built on the block principle with refrigeration divided into domestic and commercial, and air conditioning divided into residential and commercial systems. Students test and repair actual equipment and built-up trainers. Field trips are taken, familiarizing students with actual application.
