

What Can I Do with This Major?

Aircraft Fabrication and Assembly

The Aircraft Fabrication and Assembly programs are designed to prepare students for entry-level employment in the aerospace industry. Students who complete these programs will have the necessary skills to be employed by aircraft manufacturers and subcontractors in aircraft structures and composites fabrication and assembly. The associate degree is designed to prepare students for the Aircraft Manufacturing Technology (AFMT) Bachelor Degree of Science.

AVC Certificates & Degrees

- Advanced Aircraft Structures certificate
- Blueprints and Structures certificate
- Aircraft Fabrication and Assembly Technician certificate and associate degree

Examples of Work Industries & Employers

Aerospace Corporations
Manufacturing Companies
General Aviation Firms
Commercial Airlines
Aircraft Manufacturers

Possible Job Titles

Aircraft Assembler
Airframe/Systems Technician
Composite Fabricator
Multi-skilled Composite Low Observable Technician
