NURSING What can I do with this major?

AREAS

STAFF NURSING

Examples of Specialties by: Work Setting or Type of Treatment: Perioperative (operating rooms) Emergency/Trauma Critical Care Ambulatory Care Home Health Care Hospice and Palliative Care **Occupational Health** Labor and Delivery Radiology **Psychiatric-Mental Health** Holistic/Complementary Care Specific Health Conditions: Oncology, Rheumatology, Diabetes Management. Addictions Treatment, HIV/AIDS Care Organ or Body Systems, such as: Cardiovascular Gastroenterology Gynecology Dermatology Nephrology Orthopedic Urology Respiratory Well-defined Populations: Neonatology Pediatrics Adults Geriatrics Advanced Practice Nursing (APRN): **Clinical Nurse Specialist** Nurse Anesthestist Nurse Midwife Nurse Practitioner

EMPLOYERS

Hospitals Clinics and medical centers Physicians' offices and medical groups Outpatient surgery centers Ambulatory care centers Home health agencies Nursing care facilities Rehabilitation centers Hospices **Dialvsis** centers **Diabetes care clinics** Birth centers Psychiatric hospitals and mental health agencies Health maintenance organizations Large corporations Educational institutions Summer camps Correctional facilities U.S. Department of Veterans Affairs Integrated healthcare facilities

STRATEGIES

Work or volunteer in healthcare and medical settings during summers and breaks. Shadow nurses in different settings to learn which ones hold the most appeal. Gain experience through externship or internship programs. Take electives in areas such as wellness, holistic health, medical ethics, and death and dying. Get involved in student organizations and seek leadership roles. Learn to be organized and to manage stress well. Develop patience, the ability to work with both patients and families for long periods, and good listening skills. Learn to work effectively with people from different cultures, races, and socioeconomic backgrounds. Prepare to work nights, weekends, and holidays in a hospital setting. Cultivate managerial skills for head nurse or other supervisory positions. Many specialties exist and some nurses combine specialties, i.e., pediatric oncology. Obtain a master's or doctoral degree for advanced practice nursing. Some specialties may also require certification. Join relevant professional associations and plan to attend continuing education programs.

AREAS

COMMUNITY AND PUBLIC HEALTH

Health Education and Promotion Disease Prevention

Specific populations include elderly, homeless, teen parents, tobacco users, those at risk for specific diseases, those at risk in specific areas, i.e. rural

EMPLOYERS

State and local health departments Home healthcare agencies Public schools Daycare centers Mental health facilities Correctional facilities Senior centers Nurse-run clinics Ambulatory outpatient facilities Religious organizations Social service agencies Wellness centers Community education programs

STRATEGIES

Learn to relate well with people from a variety of backgrounds.

Plan to specialize in the needs of patients in vulnerable or underserved populations i.e., rural health, elderly, homeless, tobacco-users, teen parents.

Develop skills in management, decision-making, motivating, teaching, counseling, speaking, writing, budget management and evaluation of program effectiveness.

Gain experience handling emergencies, working independently, and demonstrating flexibility.

Expand knowledge of health issues related to age, culture/language (bilingual nurses are in demand), religion, and government policies. Some positions may require a master's degree in

nursing, public health, or a related field.

INDEPENDENT PRACTICE

Temporary Staffing Travel Nursing Personal Services Contracting Private Duty Healthcare staffing agencies Travel nurse companies Businesses and organizations with temporary needs Private households Develop flexibility and adaptability.

- Gain years of experience in a hospital or other healthcare setting.
- Learn to work autonomously and make decisions independently.
- Be prepared to move frequently to various locations either locally or abroad for a career in travel nursing.

GOVERNMENT SERVICE

Staff Nursing Administration Policy Development Research Government health agencies including: Public Health Service Indian Health Service Veterans Affairs Peace Corps AmeriCorps VISTA Armed services Correctional facilities

- Define an area of interest, as government work offers a variety of practices.
- Earn a master's or doctoral degree for positions involving research, policy development, or administration.
- Become familiar with other cultures, languages, health systems, and beliefs.
- Be prepared for combat nursing in armed services.

Combine interest in nursing and healthcare with another field by earning appropriate graduate degrees or gaining relevant experience.
Minor in business or communications as an undergraduate for non-clinical roles.
Develop strong computer skills and an understanding of business practices.
Gain experience as a staff nurse before pursuing expertise in another direction.
Demonstrate initiative and effective leadership skills.
Seek professsional certifications in speciality areas.
Join and contribute to relevant professional associations.

GENERAL INFORMATION

- Nursing is the largest healthcare field. Three out of five nurses work in hospitals and many work part-time. Because some patients require continual care, nurses work rotating shifts including nights, weekends, and holidays.
- Nursing combines science and technology with the desire to help people. Healthcare professionals must be prepared to assist people of all types and backgrounds.
- Nursing requires both physical stamina, emotional stability, and the abilities to follow orders and direct others.
- Other qualities important to the field include orientation to detail, sympathy and concern, responsibility, and the ability to handle stress and emergency situations.
- There are multiple educational paths to acquire the Bachelor of Science Nursing (BSN) degree and the Registered Nurse (RN) designation. Research alternatives such as accelerated BSN programs or Master's Entry programs.
- Seek knowledge of continuing education opportunities and certification options through resources such as American Nurses Credentialing Center (ANCC).
- · Research loan repayment programs for nurses who work in critical shortage facilities.
- All states regulate nursing by requiring licensure. Investigate individual state requirements, as well as the Nurse Licensure Compact (NLC) if planning to relocate.
- Earn a master's degree to prepare for advanced practice nursing including: clinical nurse specialist, nurse practitioner, nurse midwife, nurse anesthetist, and administration. Earn a doctoral degree for research or teaching at a university.
- Many opportunities outside of traditional nursing exist for RN's who want to work in non-clinical roles. Research the skills, experiences, and degrees necessary
 to attain these positions.
